Crop calendar

INTEGRATION OF CROPPING PATTERNS, SEASONAL RAINFALL AND SATELLITE IMAGE ANALYSIS

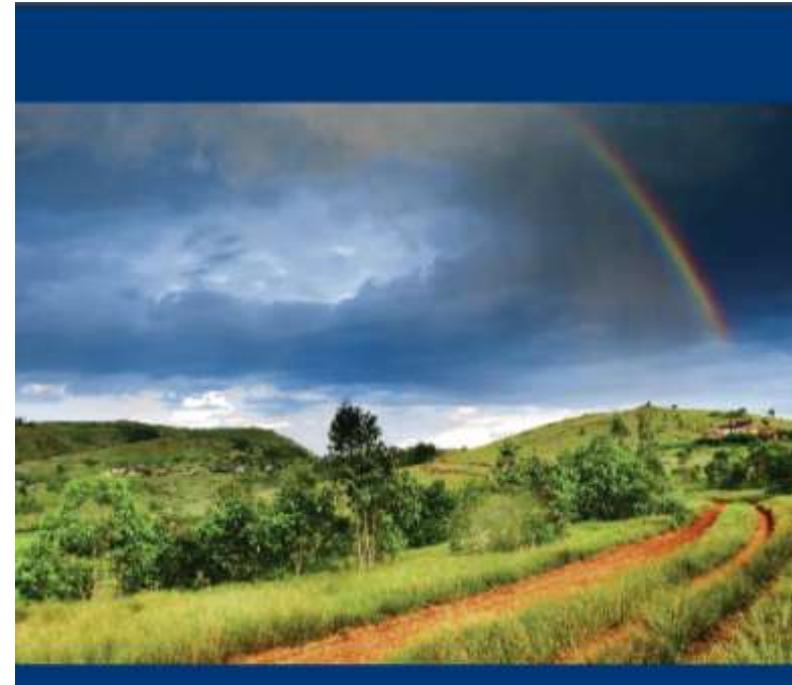

The screenshot shows the FAO Crop Calendar website. The header includes the FAO logo and the text 'Crop calendar - a crop production information tool for decision making'. Below the header is a large image of farmers in a field. The main content area is divided into three sections: 'about', 'select a crop', and 'select a country'. The 'select a crop' section lists various crops like Amaranthus, Artichoke, Asparagus, Aubergine, Bambara groundnut, Banana, Abyssinian Barley, Bean common, dry, Bean, Lima, Bean, broad green, Bean, faba, Bean, green, Beet, red, Beet, table, Broccoli, and Artichoke. The 'select a country' section lists countries like Mauritius, Morocco, Mozambique, Namibia, Niger, Nigeria, Sao Tome and Principe, Senegal, Sierra Leone, Somalia, Sudan, Swaziland, Tunisia, Uganda, United Republic of Tanzania, Zambia, and Zimbabwe.

Micro-assurance indicielle

- De nombreux projets pilotes
- Exemples :
 - Kilimo Salama
 - Planet Guarantee (projet EARS-FESA)
 - MicroEnsure
 - et autres
- Techniquement réalisables
- Utilisation majeure de mobiles →
Atteindre les agriculteurs
- Temps de passer à une échelle supérieure

Surveillance de la croissance des cultures

La riziculture avec une résolution de 5m tous les 5 à 11 jours

Le niveau de détail de 5m permet la surveillance des exploitations de petite taille

Conseils d'irrigation

The crop has no water stress when the soil moisture is above the critical level and below the field capacity

When the soil moisture drops below the critical line, irrigation is advised

Advisory

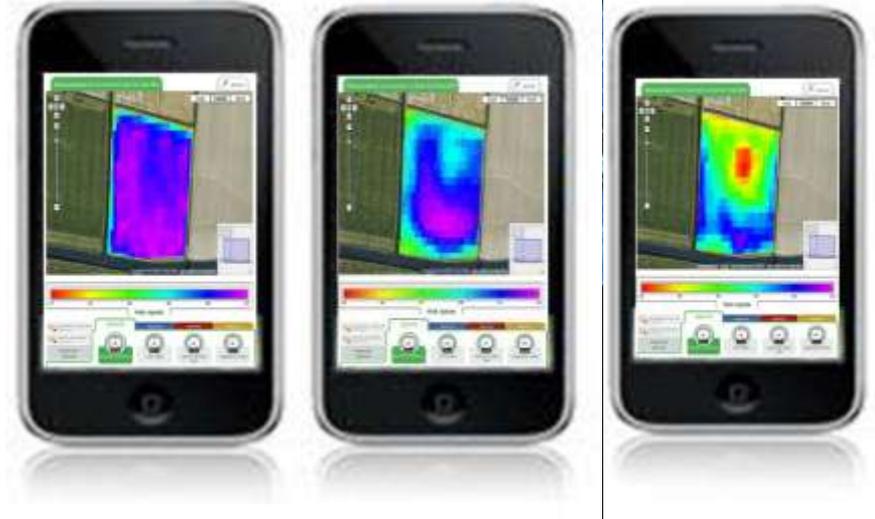

Insurance/finance

Possible service provision

- Calendriers des cultures
- Informations météorologiques
- Cartographie
- Surveillance (p.ex. la croissance végétale)
- Irrigation / conseil d'approvisionnement d'éléments nutritifs
- Sur base individuelle
- Intégré aux services de chaîne de valeur
- Complémentaire à la micro-assurance

Pourquoi utiliser des données satellitaires?

- Objectif, consistant, transfrontalier
- Peu ou pas d'infrastructures de surveillance (locales)
- >25 ans de séries chronologiques (satellite géostationnaire, Landsat)
- Beaucoup de nouveaux satellites ont été (et seront) lancés, peu ou pas de frais

Landsat 8 (US, 2013)
No cost
