Climate Services*

# Dutch Cooperation on Water and Climate Services

## *(Convenant Informatieketen Water en Klimaat (CIWK))*

---

- Founded in 2011. The secretariat is hosted by the Netherlands Water Partnership (NWP).
- 45 Members working across the information chain to transform raw data into valuable information systems.
- Water, space, agricultural and geomatic expertise is used to address challenges with *too much* or *too little* water. For example in developing:
  - *General Information Services*
  - *Water Management Services*
  - *Water Security Services*
  - ***Food Security Services***
  - *Other Services*

# Information Chain

---

**Netherlands  
Cooperation  
on Water and  
Climate Services**

# Services NWP/CIWK

---

- NWP/CIWK provides G4AW support in:
  - Building an appropriate business model.
  - Linking G4AW to other initiatives in the water sector.
  - Information and contacts in a number of G4AW countries (with the support of NWP country advisors).
  - Insight in specific market opportunities in G4AW countries.
  - Increasing the visibility of G4AW initiatives and the portfolio of G4AW projects.

# Partnering in G4AW

---

- Within the G4AW programme CIWK/NWP supports organisations in building a consortium by finding project partners:
  - Dutch organisations looking for a partner from
  - Organisations in G4AW countries that have expressed interest in participating in the G4AW program in one of the matchmaking missions of NSO.
